

Mrs. Haun's

March News

March will see us taking a tour of our Solar System with discussions about the planets, sun, moon, and stars taking place. Information and supplies for the Family Planet project will be sent home. Have fun and we will look forward to seeing what you create together.

We will have a fun time wearing green for St. Patrick's Day on the 17th & 18th before Spring Break begins the week of the 22nd.

Our science focus for the month will be on light from the sun and how rainbows are made. The terms refraction, prism, and spectrum will be introduced as we explore different ways to bend light and view the colors within white light.

If you have any questions or concerns please come to us with any, we aim to be of service to you.

Thank you. ☺

This month features:

- letter: **Ss, Uu, Gg,**
- number: **13 & 14**
- shape: **stars circles shamrock**
- color: **Green**

It looks like play....
Through Science a child:

- Follows curiosity to explore and discover the wonders of the world
- Enjoys the sensory experiences of seeing, hearing, smelling, touching, and tasting
- Becomes aware of responsibility for caring for earth and nature
- Learns to care for plants and animals
- Develops cause and effect relationships
- Observes similarities and differences
- Increases and expands vocabulary

Through cooking a child:

- Develops coordination and motor skills
- Increases perception of physical senses
- Learns basic information about nutrition and health
- Measures, mixes, kneads, pours, etc.
- Follows sequence of recipe
- Uses math skills
- Learns to taste new things

HOME FUN

- Use markers and index cards or sticky notes to label a room; begin with initial sound letter and a few objects; then move towards writing the whole word and increased number of items.
- Practice retelling familiar events in chronological order; like getting dressed for the day or setting the table. Point out key events with child during the process, then later in the day, ask child to tell three things he/she did in order to get dressed. Use proper terms to introduce and expand vocabulary. Try asking "what happened next?" or "what happened before" to help with sequencing.
